

ORACLE®

Oracle Linux Health Check Program References, ULN and Local yum

<Speaker Name and Title>

Oracle Linux Distribution

Built for the Enterprise DataCenter

- Oracle Linux is a tracking distribution of Red Hat, which is derived from the Fedora Core project
- Unique distribution because:
 - Two kernels
 - Unbreakable Enterprise Kernel (UEK) developed by Oracle
 - Red Hat Compatible Kernel developed by Red Hat
 - User-space compatibility with Red Hat Enterprise Linux
 - All certified RH ISV's are supported on Oracle Linux
 - First Linux distribution built and tested with solutions stack
 - Validated configurations
 - <https://oss.oracle.com/validated-configurations.html>
 - Tuned for Enterprise applications and middleware
- Download for free from <https://edelivery.oracle.com/linux>

Keeping Current

Linux Roadmap: Where to find information

- For Oracle Linux
 - <https://linux.oracle.com>
 - <https://oss.oracle.com>
